Safety Information

About Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms including: light headedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms – children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting further from the television screen, using a smaller television screen, playing in a well-lit room and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Other Important Health and Safety Information

The Xbox Instruction Manual contains important safety and health information that you should read and understand before using this software.

Avoid Damage to Your Television

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be played safely on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played safely on your set.

Unauthorised copying, reverse engineering, transmission, public performance, rental, pay for play or circumvention of copy protection is strictly prohibited.

EA SPORTS Tip: After a shot, no vibration in the controller means that you found the sweet spot.

EA SPORTS Tip: For chip shots, the approximate distance for the shot is determined by the position of the targeting marker. Position the marker and then execute a full swing with the thumbstick.

Use Mulligan (when ON)	B
Call replay	X

- For spin control of your ball, repeatedly press ○ after you swing. Move the left thumbstick or right thumbstick to change the direction of the spin. Although spin control is applied only while the ball is in the air, the effects of the spin are not evident until the ball is on the ground.

Traditional Games

Over the years, a number of variations on the grand old game of golf have become popular alternatives on the course.

Stroke Play

In this basic round of golf, golfers try to complete a round in the fewest number of strokes. The player with the lowest score after 18 holes wins.

Match Play

Two golfers play head-to-head against each other on the course of your choice. The golfer who wins the most holes is declared the winner.

Skins

Skins is similar to match play except that two to four golfers compete at each hole for a money prize called a "skin". To win a skin, you must win the hole outright.

- If two or more golfers tie ("halve") for the best score on a hole, the skin for that hole is carried over. The next golfer to win a hole outright wins all carryover skins.

Practice

Play a round or a single hole without the pressure of a field of competitors.

Stableford

In Stableford games, the player's score on the hole is based on the following scoring system: -1 pt. for a bogey, 0 pts. for par, 2 pts. for a birdie, 5 pts. for an eagle and 8 pts. for a double eagle. For a double bogey or worse, a player scores -3.

Alternate Shot

In an Alternate Shot match, two teams of two players compete against each other, each team using one ball. Players on each team take alternate shots.

Best Ball

In Best Ball, each team of two players scores the team's best ball on each hole. A team's total score is the sum of all of its best balls.

Fourball

In Fourball, a form of match play, each team of two players plays their best ball against the other team's best ball. The team with the lower best ball score for the hole wins the hole.

Arcade Modes

In the Arcade modes, you can play some fun golf variations that might get you thrown off a real golf course.

Battle Golf

In Battle Golf, you're playing for clubs in a match play format. The winner of each hole is allowed to remove a club from his opponent's bag or add one back to his own. The golfer who wins the most holes is declared the winner.

Long Drive Shootout

In a Long Drive Shootout, the game is simple: drive the ball as far as you can. Drives must land on the fairway to score.

SkillZone

In each of five different SkillZone games, you can earn money for the TOUR. Each SkillZone offers three challenging environments.

Speed Golf

Compete head-to-head for money as you literally run through the course. After hitting your shot, you must run to your ball. You can run faster on the fairway than in the rough.

- To run, move the left thumbstick. To change direction, move the right thumbstick.
- To run faster, press **○** repeatedly.
- To stop your ball from rolling when you are near it, press **A**.
- To restart at the tee, press **BACK**. Teeing up again costs \$50 and time.

Speed Golf Scoring

You earn money from your opponent for completing tasks before your opponent does. Drain your opponent's bank to \$0 to win the game.
